

SIGHTLINE

LOGIC PUZZLE

Every number can see something.

Sightline is a pure-deduction puzzle game where numbers tell you how many bombs they can see.

Every puzzle has a logical solution. **No guessing. No luck. Just deduction.**

WHAT ARE YOU DOING?

One rule. Read it in seconds.

The board above is the final state of a four-step example: a revealed tile shows edge numbers; a number counts the bombs visible along its line; two lines cross to pin a bomb; every safe tile is revealed.

ONE RULE, INCREASING DEPTH

The board changes. The rule doesn't.

LEVEL 5

Walls

Walls cut off sightlines.

LEVEL 9

Directional channels

Channels pass sight along their direction and block it across them.

LEVEL 25

Reflectors

Reflectors redirect sight.

Purple tiles

A purple number tile indicates the amount of bombs immediately in the tiles around it, corners included, and it ignores sightlines entirely. Sightlines of other tiles pass straight through purple tiles. Unlike a wall, they never block another tile's view.

Got it

LEVEL 12

Purple tiles

Ignore sightlines and count the eight tiles around them.

LEVEL 50

One-way arrows

Only let sight through the way they point.

LEVEL 75

Portals

Sight goes in one and comes out the other.

The language stays simple. The deductions don't.

Every puzzle remains logically solvable. All 400 are verified by the solver before they ship.

UNIQUE CHALLENGES

WHY ARE YOU DOING IT?

It started with one question.

What if a Minesweeper-style clue didn't tell you what was immediately around it, but instead told you what it could *see*?

That created a visual rule that takes seconds to understand but opens a surprisingly large space for deduction.

I love games where complexity emerges from a small number of consistent rules rather than continually adding exceptions, and Sightline grew naturally from that idea.

— YONI, DESIGNER

THE PRODUCT

One game. Every screen. One save.

STEAM DECK • FULL CONTROLLER SUPPORT

IPHONE • IPAD •
ANDROID

STEAM • WINDOWS • MACOS

IOS

ANDROID

STEAM

MACOS

STEAM DECK

CONSOLE •
POTENTIAL

400 levels

Eight board shapes, a structured progression that introduces each mechanic in its own moment.

Daily puzzle

The same board for everyone that day, with streaks.

Global leaderboards

Daily, time challenge and campaign boards across every platform.

Cross-device progression

Link a phone to a PC or Deck once; the save follows the player.

Cross-save

One account service behind iOS, Android and Steam identities.

Online systems

Friends, friend codes, shared Daily results.

Large content pool

Campaign, Daily, Time Challenge, a glossary that fills in as mechanics are met.

Platform-native input

Touch, mouse, keyboard, controller, Deck gyro; colour-blind palettes; reduced motion.

SIGHTLINE

A PUZZLE OF SIGHT,
 LOGIC & DEDUCTION

FOLLOW THE SIGHTLINES

Numbers reveal how many threats they can see.

SOLVE WITH PURE LOGIC

Every puzzle has one logical solution.

A NEW PUZZLE EVERY DAY

Test your mind. Sharpen your focus.

NO GUESSING.

JUST LOGIC.

HOW FAR

CAN YOU SEE?

FOLLOW THE

SIGHTLINES

EVERY NUMBER

IS A CLUE

Built. Tested. Not yet launched.

Sightline's core development has been self-funded and is substantially complete. It is currently in final polish, platform preparation and release preparation.

Sightline has undergone extensive testing across macOS, Steam, Steam Deck, iOS and Android, including:

- | | |
|--|--|
| ☒ Core gameplay | ☒ Progression |
| ☒ Saving | ☒ Cross-device progression |
| ☒ Cross-save | ☒ Global leaderboards |
| ☒ Online functionality | ☒ Platform-specific UI and input |

Sightline is substantially complete, cross-platform and extensively tested — but its public marketing launch is still ahead of it.

The store pages, builds, achievements and trailer exist today. What hasn't happened yet is the part a partner changes most.

THE LAUNCH OPPORTUNITY

The game exists. The audience is still to be built.

Sightline has not yet had a meaningful public marketing campaign, and it does not yet have an established audience.

This leaves its reveal, audience-building campaign, creator outreach, press strategy and broader launch opportunity largely untouched.

PRODUCT MATURITY

High

MARKETING RUNWAY

High

WHO ARE YOU?

Yumloop.

THE COMPANY

Yumloop is a new independent games company founded by Yoni, a former Rockstar designer. Sightline is Yumloop's first release.

Yumloop is being built as a long-term independent games company focused on original games with strong, immediately understandable mechanical identities.

YONI • FOUNDER / DESIGNER

Former Rockstar designer, with credits on Red Dead Redemption 2 and Grand Theft Auto VI. Based in Scotland.

Designed, built and shipped Sightline across every platform above.

WHERE DO YOU WANT TO GO?

A real first audience, then a studio that lasts.

IMMEDIATELY

Give Sightline the strongest possible launch across mobile and PC, establish its first meaningful audience, and explore the right console opportunities.

LONGER TERM

Establish Sightline as Yumloop's first successful release and build Yumloop into a sustainable independent studio capable of continuing to create and release original games.

WHAT DO YOU NEED TO GET THERE?

I can release Sightline independently. I’m looking for a partner who can make the opportunity bigger.

Sightline’s core development has already been self-funded and is substantially complete, so I’m not primarily seeking financing to turn a prototype into a finished game.

I’m looking for a publishing partner who can materially increase Sightline’s potential through:

LAUNCH STRATEGY	MARKETING	USER ACQUISITION
PLATFORM RELATIONSHIPS	PR & CREATORS	LOCALIZATION
RELEASE SUPPORT & QA	CONSOLE STRATEGY & PORTING	THE RIGHT ANNOUNCEMENT

I’m not looking for a publisher simply to put another logo on Sightline. I’m looking for a partner whose involvement can meaningfully change its trajectory.

WHEN WILL YOU BE THERE?

Ready to move quickly.

Target launch: Q4 2026 — flexible with publishing strategy.

Sightline's advanced development state means it can move toward release quickly.

The final launch date has not been publicly committed and remains flexible enough to accommodate the right announcement, marketing and platform strategy with a publishing partner.

WHY RAW FURY?

Why I'm writing to Raw Fury.

I'm approaching Raw Fury because of the breadth of mechanically distinctive independent games you've successfully helped bring to market.

Sightline isn't a game whose value comes from enormous production scope. Its strength is a simple central idea that creates significantly more depth than it initially appears to.

I'm looking for a publisher that sees that simplicity as a strength and can help communicate it to a much larger audience.

THE PARTNERSHIP

Sightline first. Yumloop alongside.

I'm seeking a publishing partnership around Sightline while building Yumloop as an independent long-term games company.

I'm very open to building an ongoing relationship with the right publishing partner where it makes sense.

SIGHTLINE

LOGIC PUZZLE

Every number can see something.

Sightline is substantially complete and available to play now. I'd love to hear what you think.
